PRACTICE TEST

SAT Practice Test 4

AIMING FOR

SAT, 5 Dec 2026

PREPARED

28 Sep 2026

TOTAL

1180

READING & WRITING

610

MATH

570

REALISTIC TARGET

1300–1340

with 5 hrs/week

Reading is a solid base: meaning, structure and inference questions are mostly right. Points are leaking in two places: punctuation rules in Writing, and anything non-linear in Math (quadratics, exponentials, equivalent forms). Both are rule-based and quick to fix, which is why the target is realistic for December.

Reading & Writing 11 skills

Information and Ideas ~26% of section

Central Ideas and Details	4/5	Strong
Command of Evidence (Textual)	3/4	Shaky
Command of Evidence (Quantitative)	2/3	Shaky
Inferences	3/4	Shaky

Craft and Structure ~28% of section

Words in Context	6/7	Strong
Text Structure and Purpose	3/4	Shaky
Cross-Text Connections	2/2	Strong

Expression of Ideas ~20% of section

Transitions	3/5	Shaky
Rhetorical Synthesis	4/5	Strong

Standard English Conventions ~26% of section

Boundaries	2/7	Gap
Form, Structure, and Sense	6/8	Shaky

Fix these first

1. Boundaries

2/7 right · Standard English Conventions

Five of seven missed. Learn the four sentence-joining rules (period, semicolon, colon, comma + and/but) and drill 15 items a day for two weeks.

2. Nonlinear functions

2/5 right · Advanced Math

Reads graphs well; struggles with exponential growth written as a function. Two lessons on forms and what each number means.

3. Nonlinear equations and systems

2/5 right · Advanced Math

Set up correctly but lost on solving. Factor, the quadratic formula, and when to let Desmos find the intersection instead.

Math 19 skills

Algebra ~35% of section

Linear equations in one variable	3/3	Strong
Linear equations in two variables	3/4	Shaky
Linear functions	3/4	Shaky
Systems of two linear equations	2/3	Shaky
Linear inequalities	1/2	Shaky

Advanced Math ~35% of section

Equivalent expressions	1/4	Gap
Nonlinear equations and systems	2/5	Gap
Nonlinear functions	2/5	Gap

Problem-Solving and Data Analysis ~15% of section

Ratios, rates, proportions and units	2/2	Strong
Percentages	1/2	Shaky
One-variable data	1/1	Strong
Two-variable data and scatterplots	1/1	Strong
Probability and conditional probability	1/1	Strong
Sample statistics and margin of error	–	Not seen
Observational studies and experiments	1/1	Strong

Geometry and Trigonometry ~15% of section

Area and volume	1/2	Shaky
Lines, angles and triangles	1/1	Strong
Right triangles and trigonometry	0/2	Gap
Circles	0/1	Gap

Strong

80%+ right

Shaky

50–79% right

Gap

under 50% right
