Gabriel

IS TOLU ON TRACK?

On track for 1300 by 5 Dec

Started at 1180 on 28 Sep, now 1260: up 80 in 4 weeks (+20 a week). To reach 1300 in the 5 weeks left needs about +8 a week.

Practice test scores

Full official practice tests in Bluebook, taken timed. Latest: R&W 650 · Math 610.

The skill map all 30 tested skills

Each square is one skill; outlined squares changed band this month. It is the same map as the first score review, so you can watch it fill in.

What changed

|                                                          |                |
|----------------------------------------------------------|----------------|
| Boundaries<br>2/7 right → 6/7 right                      | Gap → Strong   |
| Text Structure and Purpose<br>3/4 right → 4/5 right      | Shaky → Strong |
| Form, Structure, and Sense<br>6/8 right → 7/8 right      | Shaky → Strong |
| Systems of two linear equations<br>2/3 right → 3/3 right | Shaky → Strong |

Where points went on the last test

|                                |   |
|--------------------------------|---|
| Didn't know the rule or method | 9 |
| Misread the question or text   | 4 |
| Careless slip (knew it)        | 4 |
| Ran out of time or rushed      | 3 |

20 questions missed on 26 Oct, sorted by cause. The biggest cause decides next month's plan.

What we did this month

- Joining sentences: the four punctuation rules, then timed sets (now 6 of 7 right).
- Exponential and quadratic functions: reading them from equations, graphs and tables.
- Rewriting expressions without losing signs.

Next month

- Quadratics: vertex form, factoring, and when Desmos is faster.
- Right-triangle trigonometry and circles (still gaps: 0 of 3 last test).
- Two more full practice tests: Saturday 14 and 28 November.

Your part this month

Keep Saturday 14 and 28 November, 9:00 to 11:30, free for full practice tests at home: phone in another room, one sitting, no pausing. That's all we need from you this month.

A strong month. The punctuation work paid off within two weeks, and the Math gaps have become 'shaky', which is the step before points. Most points now go on methods not yet learned rather than on carelessness, so the plan is more teaching, not more drilling.
